

Running JS Locally Lesson Learning Objectives

Below is a complete list of the terminal learning objectives for this lesson.

When you complete this lesson, you should be able to perform each of the following objectives. These objectives capture how you may be evaluated on the assessment for this lesson.

1. Match the commands `ls`, `cd`, `pwd` to their descriptions
2. Given a folder structure diagram, a list of '`cd (path)`' commands and target files, match the paths to the target files.
3. Use VSCode to create a folder. Within the folder create a `.js` file containing `console.log('hello new world');` and save it.
4. Use node to execute a JavaScript file in the terminal
