

# Scope Lesson Learning Objectives

Below is a complete list of the terminal learning objectives for this lesson.

When you complete this lesson, you should be able to perform each of the following objectives. These objectives capture how you may be evaluated on the assessment for this lesson.

1. Identify the difference between `const`, `let`, and `var` declarations
2. Explain the difference between `const`, `let`, and `var` declarations
3. Predict the evaluation of code that utilizes function scope, block scope, lexical scope, and scope chaining
4. Define an arrow function
5. Given an arrow function, deduce the value of `this` without executing the code
6. Implement a closure and explain how the closure effects scope
7. Define a method that references `this` on an object literal
8. Utilize the built in `Function#bind` on a callback to maintain the context of `this`
9. Given a code snippet, identify what `this` refers to
